

Gender + Sex

Image description: A complex, overlapping Venn-style diagram titled “Gender + Sex.” Multiple intersecting circles contain dozens of gender- and sex-related identity terms, showing overlap rather than fixed categories. Large clusters include “woman/womanish” (301 mentions), “man” and “male-identifying,” “he/him/his” (109 mentions), and “she/her/hers.” Other circles list identities such as non-binary, genderqueer, gender fluid, trans, transgender, cisgender, agender, and queer, with smaller counts noted in parentheses. At the center intersection are culturally specific identities—“black,” “māhū,” “mātāo,” “tāgaiya,” and “two-spirit” (7 mentions). The overall layout emphasizes fluidity, overlap, and multiplicity in gender and sex identification rather than a binary structure.

Credit info: Gender/Sex mentions from Round 3 applicant pool. Data visualization chart created by Gene Pendon (design) and Michèle Steinwald (data).
